

Hansitha Ekanayaka

Computer Science
Undergraduate

About Me

I am a motivated and detail-oriented Computer Science student at Informatics Institute of Technology (IIT) in collaboration with the University of Westminster. Currently, I have developed multiple mobile applications, gaining hands-on experience in software development. Seeking an internship opportunity to apply technical skills, collaborate with teams, and gain real-world experience in software engineering

Skills

- Team collaboration
- Decision Making
- Time Management
- Problem-Solving & Critical Thinking
- Leadership

Language

English

Sinhala

Qualifications

Education Qualifications

BSc (Hons) in Computer Science

Informatics Institute of Technology (IIT) - University of Westminster
(2024 - 2027)

Foundation in Information Technology

Informatics Institute of Technology (IIT)
(2023)

G.C.E. Advance Level Examination

Kg/ Bandaranayake National School , Hettimulla - (2025)

G.C.E. Ordinary Level Examination

Kg/ Hettimulla Nawa Maha Vidyalaya , Hettimulla -
[2022(2023)]

7 A's including Sinhala, Mathematics, Buddhism, History, Music(Ori), Geography and Health & Physical Education; 1 B in Science ; and 1 C in English.

Professional Qualifications

Technical Skills

Programming Languages

JavaScript, Python, Java,Kotlin,Dart

Fronted Development

React.js, HTML, CSS

Backend Development

Node.js

Mobile Development

Flutter, Android Development (Kotlin), Android Studio

Database Management

MySQL, MongoDB

Tools & Technologies

Git, GItHub, Figma

IDE & Environments

Visual Studio Code, IntelliJ IDEA, Android Studio,NetBeans

Projects

- Construction Company Website**
Informatics Institute of Technology | 2025 -January

Designed and implemented a responsive website using HTML, CSS, and JavaScript, incorporating interactive features such as feedback forms, previews, and navigation components. Ensured a smooth user experience with cross- browser and cross-device testing.

- Software Development Group Project**
Informatics Institute of Technology | 2025 - Present

Implementing a solution for a common transportation challenge faced by parents and school van drivers. A smart system is introduced to connect both parties through one platform. Parents can track the van's live location, receive arrival alerts, and know when their child is picked up or dropped off. Drivers can manage attendance, follow optimized routes, and communicate easily with parents. By combining these features into a single app, the school commute becomes safer, more organized, and stress-free

Extra Curricular

- An active member of the school prefects board (2019-2023)
- A member of the school Science Society.
- A member of the Student Parliament.
