SUMMARY

Enthusiastic and detail-oriented Computer Science student at Informatics Institute of Technology (IIT) in collaboration with the University of Westminster. Passionate about frontend development with a strong foundation in React, JavaScript, HTML, and CSS. Seeking an internship opportunity to apply technical skills, collaborate with teams, and gain real-world experience in software engineering.

TECHNICAL SKILLS

Programming Languages : JavaScript, Python, Java

Frontend Development : React JS, HTML, Tailwind CSS, CSS

Databases : MySQL, MongoDB, Firebase

Backend Development : Node JS

Version Control : Git, GitHub

Tools & IDEs : IntelliJ J idea, VS Code, Figma, Android Studio, Apache NetBeans

PROJECTS

VanGo | Software Development Group Project - IIT 2025 - Present

- Implementing a solution for a common transportation challenge faced by parents and school van drivers. A smart system is introduced to connect both parties through one platform. Parents can track the van's live location, receive arrival alerts, and know when their child is picked up or dropped off. Drivers can manage attendance, follow optimized routes, and communicate easily with parents. By combining these features into a single app, the school commute becomes safer, more organized, and stress-free

Smart Campus API | Client-Server Architectures Module Coursework

- Developed a RESTful API for a comprehensive Smart Campus management system that handles room allocations, IoT sensor registration, and historical sensor readings. The system utilizes thread-safe in-memory storage to ensure high performance and data consistency across concurrent requests. It features HATEOAS navigation to embed dynamic resource discoverability within API responses, alongside custom JAX-RS filters for centralized request logging and a robust global error-handling architecture for clean, reliable HTTP responses.

Cross Math Puzzle Game | Mobile Application Development Coursework

- Developed an interactive, brain-training Android mobile application where players solve dynamic cross-shaped arithmetic puzzles. The game features multiple difficulty levels to cater to different player skills, a built-in hint system to assist users through challenging grids, and a competitive leaderboard to keep players continuously engaged and motivated. Designed and built with a modern UI layout, the application focuses on smooth performance, seamless state management, and an intuitive user experience.

EDUCATION

BSc (Hons) in Computer Science

Informatics Institute of Technology (IIT) / UoW

2024 - 2028

Colombo, Sri Lanka

Foundation Certificate in Higher Education (Computing)

Informatics Institute of Technology (IIT)

Sept. 2023– Sept. 2024

Colombo, Sri Lanka

G.C.E. Advanced Level Examination

IBandaranayaka NAtional School

2025

Hettimulla

G.C.E. Ordinary Level Examination

IKg/ Hettimulla Nawa Maha Vidyalaya

2022(2023)

Hettimulla

7 A's including Sinhala, Mathematics, Buddhism, History, Music(Ori), Geography and Health & Physical Education; 1 B in Science ; and 1 C in English.

ACTIVITIES

- An active member of the school prefects board (2019-2023)
- A member of the school Science Society.
- A member of the Student Parliament.

COMPETENCE

- Project Management
- Teamwork
- Public Relations
- Time Management
- Leadership
- Effective Communication
- Problem-Solving & Critical Thinking

LANGUAGES

- English
- Sinhala

REFEREES

• Mr.Niyomal Boteju

Assistant Lecturer (Faculty of Computing)
at IIT Sri Lanka

Email : niyomal.b@iit.ac.lk

Phone : 0777377313

• Mr.Jiehfeng Hsu

Assistant Lecturer (Faculty of Computing)
at IIT Sri Lanka

Email : jiehfeng.h@iit.ac.lk
